POLICY DECISIONS EVOLUTION

at a glance

Exceptional
User Experience

Streamlines user's view to show relevant data and enhance workflow capabilities – users are more efficient and productive – whether on a laptop, tablet or phone and regardless of operating system

Supports All
Distribution Channels

Provide a streamlined experience to existing distribution channels and support your expansion strategy to reach new ones

Better
Decision Making

A combination of integration capabilities and configurable workflow enables an intuitive and flexible user and underwriting experience for improved decision making and smarter underwriting

More Control,
with Options

With an intuitive tool-set, you have the option to easily manage your own UI, rate, rules and form changes to support self-service capabilities. Or, you can leverage Insurity's seasoned experts to provide support

Technical Currency

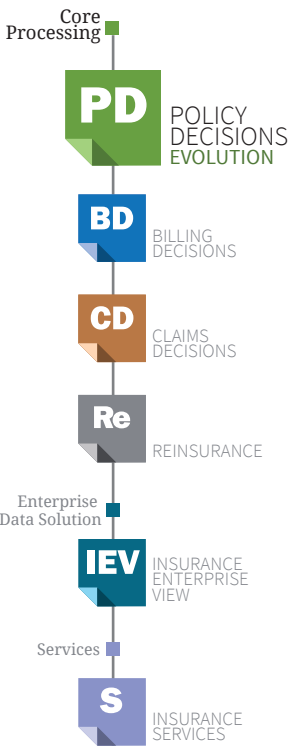

Investment protection through non-disruptive delivery model keeps customers current with technology and new functionality

POLICY DECISIONS EVOLUTION : The Choice is Easy

Policy Decisions Evolution delivers deep functionality and rich content with an unmatched array of business lines available out of the box but also enables you to easily add new products or lines of business when and if you need – supported on a platform that is designed to meet the market demands of today and the future.

Policy Decisions Evolution supports:

- All types and sizes of carriers
- Multiple types of users and roles including the support of complex relationships throughout your distribution channels
- All lines of business and programs from simple to complex, standardized, custom and low or high touch

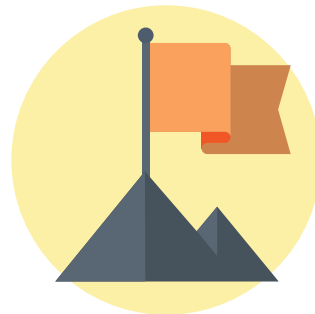

why ?

POLICY DECISIONS EVOLUTION

Policy Decisions Evolution is a complete policy administration solution for **all property and casualty lines of business** and supports the *simplest to most complex* lines of business and programs.

From **quoting to underwriting to renewal and servicing**, Policy Decisions Evolution supports the need of organizations that want more data incorporated in the user experience to support more informed and more accurate decision making.

The Insurity Difference:

Deep Heritage of Insurance Expertise

Insurity has long been one of the premier solution providers for the Insurance industry with one of the most comprehensive customer bases. Insurity has long focused on the core processing needs of a carrier's business and has built Policy Decisions Evolution upon a wealth of domain knowledge and expertise, carefully ensuring support for the complexities and nuances of the insurance business with the delivery of rich functionality and deep content coupled with modern technology.

Investment Protection

Insurity has continued, and will continue to enhance Policy Decisions Evolution to ensure that our customers' investments are protected.

Customers can customize their version of the solution to their unique requirements – yet still take advantage of future releases of Policy Decisions Evolution with upgrades and enhancements – without the cost and complexity as compared to other vendors – protecting their investment.

Bureau Based Business

Insurity's bureau content specialists support the complex task of monitoring, analyzing, interpreting & integrating bureau content into the system; and merging with exceptions on behalf of our customers - including all customer exceptions and unique implementations that our customers require.

For those who want more of a self-service capability, Policy Decisions Evolution includes a powerful tool-set to handle maintenance and enhancements on their own.

Implementation and Support

Insurity has long term relationships with their customers and it's because we work closely with them from day one beginning with requirements gathering, through implementation to ongoing support.

Insurity will work with you, and together identify the best implementation approach and ongoing support needed to suit your business needs.
