Minimize costs when catastrophe strikes with automated event alerts

"Data analytics is a key differentiator in how we operate, compete, select risks, and proactively manage our portfolio. With [Insurity Geospatial], we have empowered our underwriters and analytic teams with actionable information to improve risk selection and portfolio performance."

Jen Klobnak
Chief Operating Officer

Top 5 reasons customers choose Insurity Geospatial

Make better underwriting decisions

- Let data drive your decisions with access to an expanding network of 50+ data partners
- Integrate configurable rules to embed your expertise on top of the hazard models and building reports

Operate quickly

- Integrate decision metrics and analytics into your policy systems so you have the right data at the right time
- Confidently make decisions and empower your teams with fast, insurance-specific analytics

Better understand your portfolio

- See how your underwriting strategy is performing with portfolio analytics that give you an aggregate view of your risk
- Identify where you have successes and areas that need improvement to inform how your teams move forward together

Retain more premium

- Reduce downstream costs associated with claims with automated event alerts and analytics
- Increase policyholder retention by proactively reaching out to insureds who were impacted by a CAT event

Start driving ROI immediately

- Boost profitability with integrated underwriting, portfolio management, and event response modules
- Get up and running in as little as one hour with our turnkey and intuitive geospatial software
