

Deliver true speed to market through a modern, intuitive, and cloud-native platform

6

weeks to issue a quote

Quote a new product or program quickly with self-configuration tools

15%

reduction in claims processing time

Automate claims assignment by skills, geography, availability, and more with Sure Claims

24/7

billing data access

Monitor payment amounts and due dates by account anytime with Sure Billing

“The configuration tools are a huge value add. Now, we can copy existing programs, make a couple of quick changes ourselves, and we can get this brand new product to market. Program X + a couple of coverages = Program Y. As we were adding programs, the speed to market kept getting better and better.”

Mark Sundquist
SVP - IT Business Management

Top 5 reasons insurers choose Sure Commercial Suite

Launch products quickly

- Capitalize on new markets quickly with pre-populated, always up-to-date bureau rates, rules, and forms
- Support multiple commercial and custom lines out of the box with Sure Policy

Integrate seamlessly

- Integrate with other applications using pre-built connections and an accessible data structure
- Reduce implementation time with third-party data sources such as IHS, SmartyStreets, and Google Maps

Increase billing efficiency

- Drive productivity among your billing staff with consolidated account views
- Streamline collections and exception handling with real-time billing process automation

Resolve claims faster

- Adapt your claims process during catastrophic events in real time with configurable, low-code workflows
- Facilitate rapid adjudication of claims with automated alerts, diaries, and settlement letters

Trust a proven cloud system

- Drive business growth with scalable, secure, and always up-to-date cloud hosting
- Focus on business, not technology, with the largest, most experienced cloud software provider
